

## New Web Site

Last Updated Wednesday, 08 November 2006

We are in the process of putting our new web site together. Due to exploits in PHP-Nuke, our web site was used to relay spam emails and we had to taken it down. This forced us to redo the website and all the user information stayed within the old php-nuke site along with the Forums messages. We will try to transfer this data into this software (Joomla) as we have time. So Forums will be available again.

Thanks,

FreeDialupTeam
